

TakeAway Recycle System

Two 7.5-Gallon Systems #87702, Three 7.5-Gallon Systems #87703

Sharps Compliance offers the TakeAway Recycle System for the safe collection, storage, transport, and recycling of single-use medical devices (SUDs). This cost-effective solution allows organizations to reduce risk while addressing environmental concerns.

Almost all single-use medical devices are composed of materials that can be recycled. Using the TakeAway Recycle System ensures that all of the collected materials are processed down to their basic commodities. SUDs that are normally destined for the landfill are collected in the operating room or sterile processing department and then shipped by common carrier for recycling.

SYSTEM INCLUDES

- Two or three 7.5-gallon biohazard-labeled containers
- Absorbent pads
- 4-mil plastic bags labeled with biohazard symbol
- Instructions, packing tape, tie wraps, and content itemized list
- 1 prepaid UPS return shipping box

ADVANTAGES

- Minimize Waste Stream: Don't trash single-use medical devices — recycle them
- Save Money: Eliminate costs associated with reprocessing
- Avoid Liability: Control infection by avoiding reprocessed devices
- OSHA, DOT, and The Joint Commission compliant
