Managing Mercury Equipment for Recycling

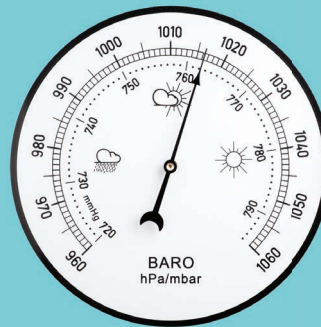

Sharps Compliance offers **Mercury Device Recycling** mailback systems as a convenient way to manage your outdated mercury devices. The system is a safe, easy, and compliant way to clear out instruments that may be collecting dust in storage.

Standard size: 1-gallon pail

Alternate sizes available upon request and review.

Great for managing:

- ▶ Thermometers
- ▶ Thermostats
- ▶ Mercury switches
- ▶ Barometers
- ▶ Sphygmomanometers

Order the container online, place the mercury devices into the container on your schedule, and then seal the container back in the return shipping box. The prepaid return shipping label ships the materials back via a common carrier. There are no hidden fees or billing surprises.

Have mercury-containing light bulbs? See our Lamp Recycling Solutions.
