

TakeAway Medication Recovery System – DEA Reverse Distribution for Registrants

1.25-Gallon #87011, 2.5-Gallon #87012, 5-Gallon #87015

For smaller entities who don't typically use a reverse distributor, the TakeAway Medication Recovery System for DEA Reverse Distribution for Registrants is a convenient, environmentally-safe option. It is a DEA-compliant collection, return and destruction solution for DEA registrants' expired or unused controlled substances (Schedules II-V).

All orders must be placed with DEA registrant's registration number. The customer must complete DEA Controlled Substances for Destruction Form, and then Sharps will release the order, and ships the customer a system, including a return UPS label. Additional forms may be required if Schedule II's are included in the inventory. No hazardous pharmaceuticals or biohazardous materials are allowed. Once the pail is full, the customer packages and ships it to Sharps' DEA-approved reverse distribution location for safe and compliant treatment.

SYSTEM INCLUDES

- Single collection pail in 1.25-, 2.5- or 5-gallon size
- Prepaid return shipping box
- Proper destruction and documentation

ADVANTAGES

- No contracts or hidden fees – order systems as needed
- One affordable price for collection, shipping, proper destruction and documentation
- Approved for controlled medications, keeping you in compliance
- Easy to package for return, saving you time for other important job responsibilities
